# What Sets Apacer Apart?

# **Professional Technique**

- Strong HW/FW engineering know-how
- Customized design with a variety of solutions
- State-of-the-art technology

# **Quality Assurance**

• 100% reliable & compliant

Wide temperature test Thermal shock test Strict ORT (Ongoing Reliability Test) Power cycle test Altitude test Reliability test (Vibration/Shock)

# **Extensive Experience**

- Tier 1 industrial SSD & memory supplier; delivered over 329 million units
- Comprehensive experience in product customization (across industries)

**INDUSTRIAL SSD SUPPLIER GARTNER** 

### **Reliable Service**

- Fixed BOM solution
- Longevity of supply, EOL & LTB notice
- Manufacturing in Taiwan protects IP

# **Trustworthy Supplier**

- A global-scale service and maintenance system
- Responsive local FAE technical support
- 24/7 flexible and quick delivery service
- Complete RMA system

# Solutions for Extreme Environments

Nowadays, as industrial memory products have been widely used in various kinds of applications, the need for memory modules that can maintain highly stable operating performance in harsh conditions is remarkably increasing.

As an industrial solution veteran and leading memory brand, Apacer always takes an outside-in perspective and strives for new breakthroughs, providing many value-added solutions and technologies for extreme environments to ensure product reliability, stability and durability.

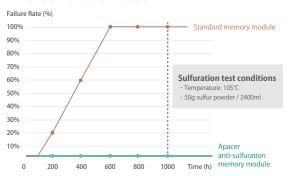

# Technologies and Advantages

Apacer's patented anti-sulfuration memory modules replace standard silver electrodes with an exclusive alloy which has passed the ASTM B809-95 anti-sulfuration test.

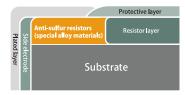

- World's first anti-sulfuration memory modules
- Solve corrosion problems effectively and increase overall system lifespan

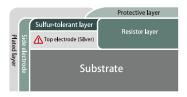

### Anti-sulfuration test

# Anti-sulfuration technology comparison

# Apacer's advanced anti-sulfuration technology Method Adopts exclusive and improved alloy materials replace normal electrode Advantages / Disadvantages Apacer's advanced anti-sulfuration technology Covers an sulfur-tolerant layer to protect the electrode Unstable anti-sulfuration performance, improved product reliability and durability due to process failure

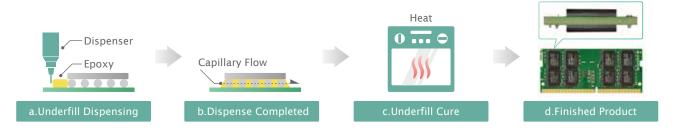

# Underfill

Apacer provides underfill technology to increase product reliability and resistance to various thermal and mechanical shocks, ensuring that products continue to operate normally in high vibration and under extreme changes in environmental temperature.

- Strengthens the solder joints between solder balls and printed circuit board
- Increases the product's resistance against shock and vibration
- Reduces thermal stress damage
- Complies with MIL-STD-810G shock and vibration requirements
- Increases product reliability and lifespan

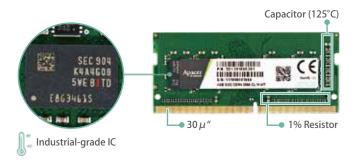

# Wide Temperature Wide Temperature

Especially designed for harsh climates and special environmental conditions.

- Operating temperature range: -40 °C ≤ TC ≤ 85°C
- All industrial-grade components (DRAM, PCB, resistors and capacitors) ensure stability and reliability
- High/Low temp. test / Temp. cycling test
- Power cycling test

# Insists on using industrial-grade DRAM ICs

# Apacer's strengths of wide temperature memory

Apacer industrial-grade wide temp. memory		Standard memory (Commercial)
Industrial-grade (-40 ~ +85°C) Suitable for extreme high and low temperature environment	<b>■</b> DRAM	Commercial-grade (0 ~ +85°C)
<b>30 μ"</b> Avoids gold finger oxidation and ensures the stability of signal transmission	■ PCB plating thickness ▶	3 µ "
Up to +125°C Ensures more stable voltage supply in high-temperature environment	Capacitor temp. specification	+85°C
± 1% tolerance Increases circuit stability and durability	■ Resistor specification ▶	± 5% tolerance

# 30μ Gold Finger

With the  $30\mu$  gold plating, the connector interface is more reliable and can withstand the potential damages in industrial applications.

# Conformal Coating

Enhances reliability of products by applying coatings on the surface of printed circuit boards. The protective film can safeguard devices from dust ingression and liquid immersion.

- Uses automated spraying to maintain precise coating thickness
- Enhances product reliability
- Prolongs DRAM modules' lifespan

Apacer DRAM module with conformal coating

# 32 Bit 32-Bit SODIMM

Mainly supports the ARM architecture. Unlike the 64-bit memory module that supports x86 system, the unique 32-bit SODIMM provides the 32-bit ARM architecture with another design option besides onboard memory.

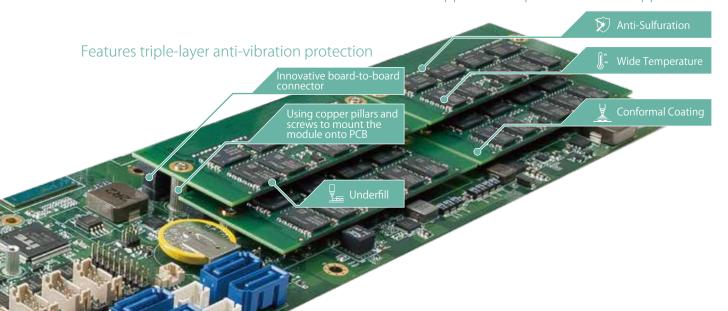

# Extremely Rugged XR-DIMM

- Innovative board-to-board connector design
- Adopts highly durable 300-pin connector and mounting holes to improve the anti-vibration and anti-shock reliability
- Dual anti-shock and vibration certification: RTCA DO-160G / MIL-STD-810G
- Supports multiple protection technologies and value-added applications

# Rugged Memory Comparison

	XR-DIMM Rugged Memory	Onboard memory
Anti-shock & anti-vibration ability	Great	Great
Memory upgradability	Yes	No
Repair difficulty	Easy	Difficult
RMA cost	Low	High
Stackable design	Yes	No
Motherboard space usage	Flexible	Uniform and inflexible

# Supports multiple value-added applications

# Embedded

Application	Defense / Transportation		

# About Apacer

Apacer is a global leader in digital storage solutions devoted to innovative storage technology and services. After 20 years in the industry, we remain dedicated to our belief in "persistence in doing the right things." Our core values, as always, continue to revolve around reliability and innovation.

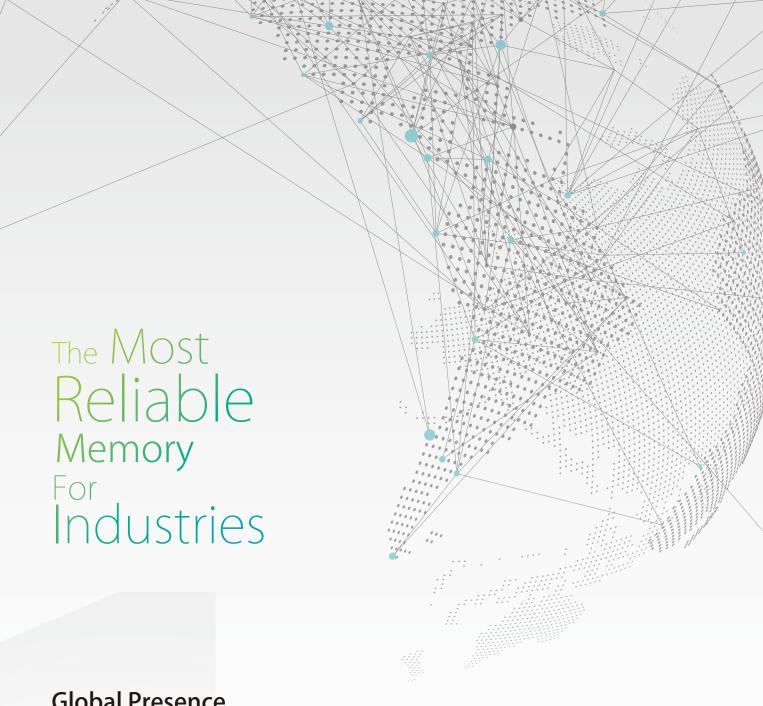

The company focuses on embedded applications for a variety of vertical markets, including military, medical, gaming, and industrial, and has become an integration expert in digital storage, innovative applications, and value-added services. Apacer is known for its advanced technologies and product quality and was ranked by Gartner as the top industrial SSD supplier for five consecutive years, from 2012 to 2016. In addition, Apacer is committed to making a positive impact on societal issues and has joined the **Responsible Business Alliance (RBA)**, which is formerly known as Electronic Industry Citizenship Coalition (EICC), a coalition promoting **corporate social responsibility (CSR)** within the global electronics supply chain. We believe that the success of a corporation is marked not by profit but by how we benefit others, whether by caring for the environment or making contributions to society.
